Achievements / Recognition

- **Promotion:** Advanced to *Senior Cyber Security Engineer* in 2025 for driving cross-team security initiatives
- **Innovation:** Designed and deployed a custom Abuse Response Service (ARS) at Grubhub, still in production today.
- **Mentorship:** Trained and onboarded junior engineers, interns, and security champions across multiple teams.

Volunteer:

Salvation Army, Fleet Feet, Red Cross

My Interests:

- NBA
- NFL
- Cooking
- Animals
- Running

Professional Development:

- Exploring game development (Meta Quest SDK)
- Studying advanced IaC practices (Terraform)
- Ongoing technical reading in applied math and cybersecurity

Current Project:

***AI Censorship Tool** — Built with Python to filter and censor banned words in real time for live and recorded media. Designed for integration with video editing pipelines.*

Professional Summary:

Senior Cyber Security Engineer with 7+ years of experience strengthening cloud infrastructure, securing CI/CD pipelines, and leading vulnerability management initiatives across large-scale environments. Skilled in AWS, Azure, GCP, Terraform, and container security. Proven track record in reducing risk, driving security automation, and collaborating with engineering teams to improve overall security posture.

Education:

The College at Brockport, State University of New York

Major: Bachelor's in *Computer Science* (AC Track) ABET Accreditation

Minor: *Mathematics*

GPA: 3.71

Honors: Magna Cum Laude

Professional Experience:

DataRobot

May 2023 – Current
(Full Time)

Remote (HQ in Boston, MA)

- Secured multi-cloud environments against OWASP Top 10 and AI-specific attack vectors through proactive threat modeling, reducing risk exposure by 35%.
- Built secure Terraform modules for AWS, Azure, and GCP supporting 8+ dev teams, cutting deployment errors by 30% and ensuring CIS compliance.
- Implemented automated scanning pipelines (Trivy, SonarQube, ZAP) and integrated Snowflake reporting, improving remediation visibility and reducing SLA breaches by 25%.
- Led external penetration tests end-to-end; triaged findings, drove remediation, and presented risk reports to executives for alignment.
- Automated license compliance checks, eliminating 20+ hours of manual effort monthly and improving audit readiness.
- Conducted technical interviews and mentored new hires, accelerating team onboarding by 40%

Grubhub Inc.

Dec 2021 – May 2023
(Full Time)

Remote (HQ in Chicago, IL)

- Designed and maintained security services (Python, Java, Bash) to mitigate fraud and credential-stuffing risks, protecting millions of user accounts.
- Embedded security gates into Spinnaker/Jenkins CI/CD pipelines, preventing high-risk code from reaching production and improving release confidence.
- Built Splunk/Datadog/ReDash dashboards that reduced vulnerability triage time by 20% and improved executive reporting accuracy.
- Automated AWS deployments with Pulumi (S3, Lambda, containers), improving security posture and reducing misconfiguration incidents by 30%
- Configured PerimeterX bot protections, blocking 95%+ of malicious traffic and saving thousands monthly in fraud-related costs.
- Served in on-call rotation for security incidents, resolving high-severity issues within SLA and minimizing downtime.

Lenels2 Carrier/UTC
Pittsford, NY

June 2018 – Dec 2021
(Full Time)

- Conducted security assessments and implemented remediation for legacy systems, reducing vulnerabilities across multiple product lines.
- Automated security testing with OWASP ZAP, Veracode, and BlackDuck, cutting manual testing time by 50%.
- Partnered with cross-functional teams to remediate vulnerabilities, ensuring timely compliance with industry standards.
- Mentored interns and facilitated technical interviews, strengthening the pipeline of future security talent.

Skills & Tools

Cloud & IaC	AWS (EC2, S3, Lambda, EKS, IAM), Azure (VMs, Functions, Key Vault), GCP (Compute, Cloud Run, IAM), Terraform, Pulumi, Ansible, Docker, Kubernetes, Fargate
Application Security	Threat Modeling, Vulnerability Management, SAST/DAST, SCA, OWASP ZAP, SonarQube, Veracode, BlackDuck, Snyk, Qualys, Burp Suite, CrowdStrike Falcon, Aqua Trivy, PerimeterX
CI/CD & Automation	Jenkins, GitHub Actions, GitLab CI/CD, Spinnaker, Harness.io, TeamCity
Programming & Scripting	Python, JavaScript (Node.js, React basics), Bash, PowerShell, SQL, Java, C/C++, C#, Ruby, HTML/CSS
Monitoring & Observability	Splunk, Datadog, ReDash, Sumo Logic, CloudWatch, ELK (Elasticsearch, Logstash, Kibana)
Databases & Servers	PostgreSQL, MySQL, MongoDB, Redis, RabbitMQ, PrestoDB, Nginx, Apache, Express.js
Collaboration & Tools	Git, Jira, Confluence, Rally, Perforce, Agile/Scrum, Technical Interviewing & Mentorship
